EXPERIENCE

PERSONAL PROJECT

Bank Network Design
2024

Designed/ implemented a hierarchical network configuring OSPF routing and DHCP servers. Established VLANs for each department, configured dynamic IP addressing, implemented port-security and shutdown violation mode. Ensured seamless communication and connectivity through proper subnetting, VLAN setup, and comprehensive testing of inter-VLAN communication.

PERSONAL PROJECT

Campus Network Design
2023

Designed and prototyped a network topology using Cisco Packet Tracer, incorporating VLANs, RIPv2 routing, and router-based DHCP for dynamic IP addressing. Configured end devices to ensure connectivity and access to both internal and external servers across two campuses.

END OF STUDIES PROJECT

Faculty of Sciences Ain chock Casablanca
2023

Blockchain is at the heart of cryptocurrencies; it is a secure transaction ledger.

The objective of this project is to create a website that allows you to:

View all transactions of the main cryptocurrencies from their blockchain.

Present statistics on trades, owners and transaction amounts

END OF STUDIES INTENSHIP

Achifaa Specialist Clinic
2022

Development of Web Application titled
Leave Management System
To change physical demanding leave to remotely.

EDUCATION
